**LIASON REPORT** – Trustee Ed Kostyshock.

1. Museum building – Picchioldi explained heating situation. . Petty came up to museum January 29 and noticed cold temperature, and reported to Picchioldi. He contacted Mayor and Village workers set up heaters and turned off interior water. Discovered that new AC/H units were turned off by Village thinking they were only AC and competing with old heaters (1972). However old units did not function, therefore museum temperature went down to 45 degrees. Village may additional heater for when temperatures go down to 20 degrees, otherwise new AC/H will work fine til weather turns that severe. Think situation is under control.
